

## Key Features

- Torque range 1Nm to 1500Nm
- Light, ergonomic design with large memory
- Advanced SPC capabilities including multiple torque graphs
- Choice of visual, physical and audible alarms
- Choice of wireless options available
- Bi-directional communication with your PC/network
- Automatic tool head recognition

## Product Overview

**IQWrench *Opta* is a high specification digital torque and angle wrench with modular software.**

The IQWrench *Opta* is a powerful, smart torque tool which is essential in both the Quality Audit and Assembly environments. Depending on customer needs, the IQWrench *Opta* can be configured as either a basic tool or an advanced data collection system. Flexibility is enhanced as the software in the IQWrench *Opta* can be upgraded almost as soon as a change is required.

The IQWrench *Opta* allows easy recording and storage of critical data: User, Time, Results and Process

IQWrench *Opta* was designed to ensure straightforward and intuitive handling for the operator. It is designed to be point of load insensitive, which means that the operator can be assured of correct measurement however the wrench is held and torque is applied – particularly useful in limited access situation.

For non-standard tool heads, the IQWrench *Opta* has a length compensation function to ensure the correct reading is displayed. The IQWrench *Opta* automatically calculates and displays the correct torque after the user has entered the length from the end of the wrench to the middle of the head of the bolt. The use of tool head adapters with various lengths can be automated by using the IQWrench *Opta*'s ID function. Torque tasks and tightening instructions (Jobs), can be disabled until the correct ID adapter is attached.

The IQWrench *Opta* features three measurement modes, Track, Peak and Audit. The above modes, except for Track, have the facility to set-up upper and lower control limits plus additional control limits. With the Angle function, Peak can be measured as either the 1st or 2nd parameter. The torque and fastener status is indicated by physical, visual and audible alarms.

The rugged, but light tool can be used on a stand alone basis or as part of a sophisticated production control system. IQWrench *Opta* communicates bi-directionally via *Opta* Comms or the *Opta* Management platform. Setting parameters for the wrench is easy and downloading data to your PC/network is assured. There is no need to manually record torque readings and considerable time savings can be achieved. All IQWrench settings can be password protected.

## Specifications

### Functional Attributes

Special features	Integrated data collector and wrench Point of load independent Real time visual representation of torque or angle with bar graph Communicates with your PC System Wide range of interchangeable attachments Auto ID of special adaptors Extra length compensations Multi graph storage Job Lockout
Integral display	Complete system – no need for separate readout
Physical measurements	Bi-directional torque (clockwise calibration unless otherwise requested), auto sense of right or left hand torque and angle values
Measurement units	Nm, Ncm, kgfcm, kgfm, ozfin, lbfin, lbfft
Measurement modes	Track – real time torque Peak (Auto-reset) – display and capture of highest torque value during the cycle; direction determined by setting; value overwritten when new cycle started (i.e. threshold torque exceeded) Angle - angle measurement can be used as 1st or 2nd controlling parameters Yield - angle and torque are simultaneously used as controlling parameters Audit - for testing of pre-fixed joints: measures torque after a defined angle
Measurement parameters	Torque & angle threshold; Upper/Lower Specification Limits (USL can be up to 100% of nominal rating); Additional Upper/Lower Control Limits
Cycle status indication	Bar graph giving real time visual representation of torque or angle Arrow icon in Display indicating HI/OK/LO torque status Tri-colour LED indicating HI/OK/LO torque status (front & back of unit) Acoustic Signal/Audible buzzer indicating HI/OK/LO torque status
Data storage	200 reading memory of both parameter values with time and date stamp User selectable autostore / store prompt Up to 50,000 readings in Quick store mode, dependent on settings Up to 50 graphs can be stored, dependent on settings
Print modes	Via <i>OptaComms</i> communication software Single reading or page mode with header including serial number and recalibration date via RS 232 to serial printers or RS232 Terminal Emulators
PC compatibility	Via <i>OptaComms</i> communication software
Operating languages	Czech; English; French; Flemish; German; Italian; Spanish; Swedish; Turkish Option to set comma or decimal point as separator for numeric values Easily toggled languages
Calibration Reminder	Visible indication of wrench calibration datemeasurement units Nm, Ncm, kgfcm, kgfm, ozfin, lbfin, lbfft

### Physical Attributes

Calibration	<p>Issued with calibration certificate traceable to National and International Standards.</p> <p><b>Standard Crane calibration:</b> 10 points; single direction (clockwise unless otherwise requested); 10% to 100% of nominal torque.</p> <p><b>Bi-direction Crane calibration:</b> 10 points; each direction; from 10% to 100% of nominal torque.</p> <p>Recalibration is recommended every 12 months.</p> <p>The calibration due date is stored in memory and is included in the output header.</p> <p>A lockout option is available to prevent usage after the calibration date has expired.</p>
Construction	<p>Point of load independent</p> <p>Shaft material: Steel</p> <p>Housing: Aluminium</p> <p>Overload capacity: 125% rated torque</p> <p>Square Drives fitted with pin and spring socket retainer</p> <p>DIN sockets have quick release function</p>
Display	Backlit graphic LCD display with backlight auto off to save power
Keypad	Easy clean membrane keypad with 6 function keys
Auto zero	Auto zero on entering measurement mode. Display indication of excessive zero offset.
Power/Battery	Li Polymer 3.7V battery - 2000 mAh capacity
Power Management	User selectable Auto Power Off : Minutes 1, 2, 5, 10, 20, 30, 40, 60; 16 hours; never
Useable battery life	8 hours typical usage
Charge time	4 hours charge
Input/output ports	<p>LEMO connector</p> <p>Wireless Communication (Optional)</p> <p>Battery charge: Via charging/comms cradle</p>
Printer compatibility	Via RS232 output: 40/80 columns
Processor	Embedded processor
Zero stability	< $\pm 0.1\%$ FSD/ $^{\circ}\text{C}$
Static accuracy	$\pm 0.5\%$ FSD
Operating environment	<p>Temperature: +5C to +40C</p> <p>Ingress Protection rating: IP40. Can be used outdoors</p>
Angle Measurement	+/- 1 $^{\circ}$
Warranty	12 months parts and labour against faulty workmanship or materials

Crane Electronics Ltd operates a calibration laboratory accredited by UKAS, the UK Accreditation Service. All Crane products are issued with a calibration certificate traceable to National and International Standards. It is recommended that torque instrumentation is recalibrated at least every 12 months.

Crane Electronics Ltd operates a policy of continuous product development and improvement, and so technical specifications may change without notice. Please clarify with Crane or your distributor that you are referring to the latest technical data sheet.
